

**MSH IM RESIDENCY AMBULATORY PRESENTATION TEMPLATE**

**SUBJECTIVE**

CC or Visit Type	The <b>single</b> thing to frame your presentation, e.g. <i>periprocedural evaluation, annual, routine follow up, chest pain.</i>
HPI	1. <b>One-liner with a short list of relevant PMH.</b> (Exclude irrelevant PMH. If you are not sure, you can list additional PMH down below.)
	2. <b>Agenda</b> , i.e. “ <i>Today, we discussed X, Y, and Z.</i> ” (We recommend choosing <b>≤ 3 topics</b> and encourage 1-2 when depth is needed.)
	3. <b>Problem-based HPI</b> # X: subjective # Y: subjective # Z: subjective
ROS	<b>Skip.</b> (Pertinent negatives and positives should be included above.)
PMH / PSH / FHx / OBGynHx / SHx	New patients: present <b>systematically</b> . Returns: <b>relevant</b> details only.
Allergies & Medications	State you updated Allergies & Meds in Epic today. You will usually include <b>relevant</b> meds above. You may ask your preceptor if they would like for you to list again.

**OBJECTIVE**

Vitals	<b>Relevant</b> vitals to today’s visit. (BP will almost always be relevant.)
Physical Exam	<b>Relevant</b> items to today’s visit.
Labs / Imaging / Procedures	Only what is <b>relevant</b> . Exclude data that does not impact your assessment or plan.

**ASSESSMENT & PLAN**

1. Brief Problem Representation	<p><b>Transform</b> the language of your HPI and include:</p> <ol style="list-style-type: none"> <li>1. acuity</li> <li>2. medical script of problem</li> <li>3. relevant qualifiers</li> <li>4. status of problem</li> </ol> <p>e.g. <i>chronic asymmetric knee arthritis that is non-inflammatory by history and physical which is not improving with conservative management including PT, or well-controlled T2D without microvascular complications</i></p>
2. Prioritized DDx	For chronic disease management, e.g. T2D this will be your <b>treatment goal and rationale</b> .
3. Plan	
<p><b><u>Problem-Based A&amp;P</u></b> # X: A&amp;P # Y: A&amp;P # Z: A&amp;P</p>	
Follow up	days, weeks, next block, 3 months, 6 months, 1 year
